## Question 1

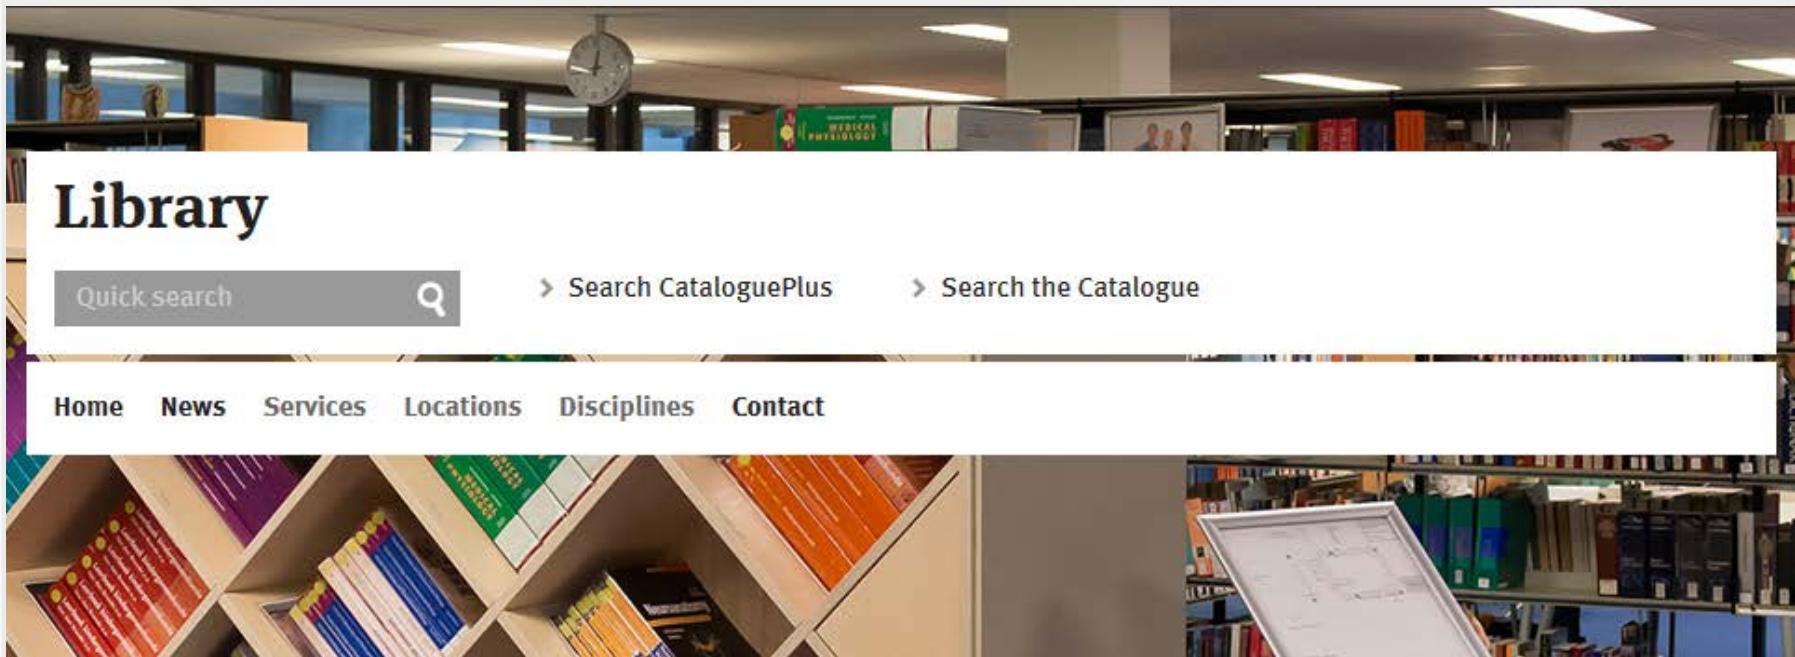

Which of the following statements is not true when searching with *Google (Scholar)*?

- A) You can broaden the results by using an asterisk for wildcard.
- B) You can limit the results to pages in the format you prefer: pdf, powerpoint, word, etc.
- C) You can limit the results by using phrase searching.
- D) You can limit the results by searching in the titles of the webpages/articles.

## Question 2

From the *UvA Library homepage* (<http://uba.uva.nl/en/home>) you can find databases by subject. How many do you find for Communication Science?

## Question 3

**Which of the following statements is not true when searching with such databases as *Communication & Mass Media Complete* or *Worldwide Political Science Abstracts*?**

- A) You can broaden the results by using an asterisk for wildcard.
- B) You have online access to all publications you find.
- C) You can limit the results by using phrase searching.
- D) You can limit the results by searching in the abstracts of the publications.

## Question 4

**What is the first word that comes to mind when you think of populism?**

The background of the image is a black and white photograph of a classical building's facade. It features several large, fluted columns supporting an entablature. Above the columns, there are triangular pediments. The building appears to be made of light-colored stone or concrete.

## Evidence For Terror Management Theory: I. The Effects of Mortality Salience on Reactions to Those Who Violate or Uphold Cultural Values

Abram Rosenblatt and Jeff Greenberg  
University of Arizona

Sheldon Solomon  
Skidmore College

Tom Pyszczynski  
University of Colorado, Colorado Springs

Deborah Lyon  
University of Arizona

On the basis of terror management theory, it was hypothesized that when mortality is made salient, Ss would respond especially positively toward those who uphold cultural values and especially negatively toward those who violate cultural values. In Experiment 1, judges recommended especially harsh bonds for a prostitute when mortality was made salient. Experiment 2 replicated this finding with student Ss and demonstrated that it occurs only among Ss with relatively negative attitudes toward prostitution. Experiment 3 demonstrated that mortality salience also leads to larger reward recommendations for a hero who upheld cultural values. Experiments 4 and 5 showed that the mortality salience effect does not result from heightened self-awareness or physiological arousal. Experiment 6 replicated the punishment effect with a different mortality salience manipulation. Implications for the role of fear of death in social behavior are discussed.

Although it is evident that individual behavior is greatly affected by one's culture, relatively little is known about the forces that promote allegiance to particular cultural worldviews. Terror management theory (Greenberg, Pyszczynski, & Solomon, 1986; Solomon, Greenberg, & Pyszczynski, 1989, in press) posits that cultural conceptions of reality serve the vital function of buffering the anxiety that results from awareness of human vulnerability and mortality. Consequently, people are highly motivated to maintain faith in the cultural conceptions of reality to which they subscribe and to defend these conceptions against threats. The purpose of the research reported in this article was to test several hypotheses derived from terror management theory concerning reactions to those who uphold and violate cultural worldviews.

Terror management theory is based largely on insights gleaned from Ernest Becker's (1962, 1973, 1975) attempts to synthesize contributions from the various social science disciplines into a coherent conception of human motivation and behavior. According to Becker, sophisticated human intellectual abilities lead to an awareness of human vulnerability and mor-

needed to provide a means of managing this terror. The conception of reality espoused by any given culture is thus the basis of a cultural anxiety-buffer that serves to protect the individual from the anxiety that results from awareness of his or her vulnerability and ultimate mortality.<sup>1</sup>

According to the theory, however, protection from anxiety requires that one achieves a sense of value or self-esteem within the cultural context. This is because the culture promises security only to those who live up to the cultural standards of value. Cultures provide this security in two ways: first, through conceptions of the world as a just place; in a truly just world, bad things would not happen to good people. Second, cultures promise real and symbolic immortality to those who live up to the standards of value; real immortality via religious concepts, and symbolic immortality via permanent contributions to the death-transcending culture. From this perspective, the cultural anxiety-buffer consists of two components: (a) belief in the validity of a cultural worldview and the standards and values associated with that worldview, and (b) belief that one is meeting or exceeding those standards and values. Thus, the cultural world-

# CORPORATE COMMUNICATION AS ONE OF THE BASIC ATTRIBUTES OF CORPORATE IDENTITY – CASE STUDY OF CHOCOLATE MILKA

Ludmila NAGYOVÁ – Ingrida KOŠIČIA ROVÁ – Martina SEDLIAKOVÁ

## ABSTRACT:

One of the basic aims of all companies doing business in the present market environment is to distinguish themselves from their competition. The basic way how to do it is to create a unique corporate identity, i.e. a functioning mixture of corporate culture, design, product and corporate communication. The research article deals with the issue of corporate communication as one of the basic attributes of corporate identity. The text's objective is to bring new information about corporate communication of *Milka* chocolate, as well as to determine Slovak respondents' opinions on the level of external communication of *Milka* and the possible ways of improving it. The research methodology included a questionnaire survey conducted in the electronic form, which was shared through social media (the research sample involved 1,518 respondents from all regions of the Slovak Republic) and testing of a smaller number of respondents via the emWave PC system (the tested group consisted of 20 participants who were randomly selected from the previous research sample). As we were interested in conducting a deeper analysis of the obtained results, four assumptions and eight hypotheses were formulated and then tested using Pearson's chi-square test, Cramer's contingency coefficient and Phi coefficient. As the results of the research show, the Slovak respondents perceive *Milka*'s corporate communication quite positively – almost 76% of the surveyed respondents claim that they consider it to be interesting and unobtrusive; more than 49% and almost 40% of the respondents say that they think *Milka*'s promotion is adequate and good enough, respectively; more than 60% of them see *Milka*'s advertisements as attractive and almost 55% of the participants think that *Milka*-related advertising is able to motivate the potential buyers to purchase these products.

## KEY WORDS:

advertising, corporate communication, corporate identity, *Milka* chocolate, quality

# Database subject headings

Although it is evident that individual behavior is greatly affected by one's culture, relatively few studies have examined the forces that promote allegiance to one's cultural worldviews. Terror management theory (TMT; Greenberg, Solomon, & Pyszczynski, 1986; Solomon, Greenberg, & Grauerholz, 1993) posits that cultural conceptions of death serve as a function of buffering the anxiety that results from awareness of one's own mortality. Cultural worldviews are highly motivated to maintain faith in the reality to which they subscribe and to defend their beliefs against threats. The purpose of this article was to test several hypotheses concerning the role of TMT in the maintenance of cultural worldviews.

Terror management theory is gleaned from Ernest Becker's (1973) synthesis contributions from the plines into a coherent conception of behavior. According to Becker, spiritual abilities lead to an awareness of humanity, and this awareness creates the potential for terror. As these abilities evolved, cultures emerge. The potential for terror puts limitations of reality such that any world

We would like to express our appreciation for conducting Experiment 5.

Correspondence concerning this article should be addressed to Dr. Greenberg, Department of Psychology, University of Arizona, Tucson, Arizona 85721.

needed to provide a means of managing this terror. The concept of anxiety-buffering properties, as espoused by any given culture is thus the basis of what we call *cult attitudes*. This concept also applies to the concepts of *death and dying*, *judgment*, *social values*, *death attitudes*, and *judges*.

Document1 - Microsoft Word

The screenshot shows the Microsoft Word ribbon with the 'References' tab highlighted in blue. The 'Page Layout', 'References', 'Mailings', and 'Review' tabs are visible. Below the ribbon, the 'Home' tab is active. On the left, there's a 'Table of Contents' button. The main area has a toolbar with icons for 'Insert Citation', 'Insert Bibliography', 'Open Mendeley', 'Refresh', 'Export as', 'Style', and 'Mendeley Cite-O-Matic'. A yellow box highlights the 'Insert Citation' icon. To the right, another set of buttons includes 'View', 'Acrobat', 'RefWorks', 'Citations & Bibliography', 'Captions', 'Index', and 'Table of Authorities'. A green box highlights the 'Citations & Bibliography' button. The status bar at the bottom shows page numbers from 1 to 17.

This is a draft to test Mendeley (Kuznets, 1955). How to insert citations (Byres, 1976) and how to generate a bibliography (Beckfield, 2009). Nothing more, nothing less.

## Bibliography

Beckfield, J. (2009). Remapping Inequality in Europe: The Net Effect of Regional Integration on Total Income Inequality in the European Union. *International Journal of Comparative Sociology*, 50(5–6), 486–509. <https://doi.org/http://dx.doi.org/10.1177/0020715209339282>

Byres, T. J. (1976). *Inequality : India and China compared, 1950-70*. (P. Nolan & O. University, Eds.). Milton Keynes: Milton Keynes : Open University Press.

Kuznets, S. (1955). Economic growth and income inequality. *The American Economic Review*.
